Gen. Otis Sends a Message-Nothing About a Battle.

WASHINGTON, Oct. 20 -- Gen. Otis has cabled from Manila as follows: "The situation in the Luzon is somewhat improved: Under the influence of the Filippines of education and property, not desiring independent government, but hostile to Spain, they are gaining ascendency in the revolutionary council. The Americans are promising nothin at the enforcement of law. Other complications seriously affect inter-island commerce and diminish revenues. Military affairs are progressing favorably though the sick report is increasing owing mostly to carlessness of the enlisted men.

"The health of the officers is good. The condition of the city and the facilities for quartering troops are improving. Fever is decreasing; intestinal troubles about the same; smallpox apparently arrested. During the month there were 28 deaths; eight from smallpox, eight typhoid fever, five malaria and intestinal complaints, three accidental."

The other matters contained in Gen. Otis' dispatch are not made public because of their bearing on peace negotiations. It contains suggestions by Otis in regard to the disposition of the Philppines and information about the insurgents.

He will cover the face of his foe with shame. He executes his threat by tearing up certain number of his own blankets. The only way his antagonist can get even with him is by tearing up a greater number of his own. If the contest is prolonged, it results in the destruction of all the blankets they have each Indian destroying his own. The one who destroys the greater number is regarded as having won the fight.

Samon's Snake Sivas

Samoa, it is well known, is one of the very few islands in the Pacific where snakes are found in plenty. None of the reptiles there, however, are venomous, and in consequence the natives show absolutely no fear of them. Their indifference to the reptiles is made markedly manifest at the ham-Savail. The dancing girls of the place are in the habit of employing the snakes for personal adornment in their dances. They tie them about their necks, their ankles and their wrists, festoon them in their headdresses, and tuck a few extra ones in the belt in readiness to replace such as may escape in the dance. At their best these sivas danced by the Samoans are revolting shows of savagery. It can be easily imagined that they are made no more attractive by the village maid and her crew of attendant girls careering around adorned with an attachment of writhing red enakes.-London Mail.

Women Nameless in Corea, The Corean woman has not even a name; in her childhood she receives a nickname by which she is known in the family and by her near friends, but when she arrives at maturity is employed only by her, parents. To all other persons she is "the sister" or "the daughter" of such and such a one. After her marriage her name is buried-she is absolutely nameless; her own parents refer to her by mentioning the district into which she has married. Should her marriage be

blessed with children she is "the mother" of so and so. If it happens that a woman has to appear in a law court the judge gives her a special name for use while the case lasts in order to save time and to simplify matters -Nationalzeitung. Incident of Trolley Travel.

"What the dash are you here for?" said an angry passenger, stepping down slowly from the footboard trolley car. He thought the conductor should have looked out for him and stopped the car where he wanted to get off, a block back.

"I'll show you what I'm here for," said the conductor, reaching for the bell cord (ting! ting!) as he spoke, and "Zip, zip, zip," came the sound of the motorman's lever turning in the notches, and

"Bz-z-zz-zz-zz!" sang the trolley, and before he knew it the passenger found himself standing alone in the middle of the road.--N. Y. Sun.

When I was in Westfield sight years ago I visited Mr Albert Atkins who was then a very great sufferer. Both he and his friends did not think it possible for him to live more than a short time. I found him so well on this visit that I insisted upon knowing what made the change. He said he had visited every point of the compass, and tried aimost everything he had ever heard recoommended, but all of no avail until he was led by the Postum Cereal articles to suspect that the little coffee he drank was really reisoning him day by day, and from the very time that he quit coffee entirely and began to use Postum, he began to get better. Representatives, T. L. McDANIEL. Moultrie County B. F. CORNELL Christian County

A Vote for Caldwell is a Vote for Bailey of Texas, but a vote for Mills is a vote for Mckinley and a Vote to settle the war in the interests of

people. Every vote cast for an op-ponent of the administration is a vote of censure for the administration, and every vote cast for a friend of the administration is a vote of confidence. A vote cast for Caldwell is a vote against McKinley and the policies he is carrying out and a vote cast for i. R. Mills is a vote for McKinley and the Atlantic: his policies. These are facts from "Suy, boys, which no American citizen can escape Only those who are opposed to Mc-Kinley and his plans are justifiable in voting for Caldwell.

ing more attention to the political scalawage of all parties than to the respeciable Democrats. He probably expeets to get along without their votes.

There is only one John M. Palmer in this district and he has declared he will vote for I. R. Mills for congress because Mills favors sound, honest money. It is unnecessary to discuss what he thinks of Caldwell and his 16 to 1 hum-

Everybody should attend the sound money rail at the tabernacle tonight and find out whether the Decatur Review was correct when it announced that ex-Sanator Palmar would support 16 to 1 Caldwell.

Those are hundreds of Domocrats in this district who supported Bryan in 1896 who have since made up their minds that the free silver scheme is a humbug and propose to kill it off effectually and they will proceed to do it by voting against 16 to 1 Caldwell.

Voters should not forget that if W. W. Foster had been nominated for sheriff Caldwell's friends, instead of camping with bim, would now be obarging that for testimonials, free.

F. J. CHENEY & CO., Toledo, O. William would not be talking about downing the court house ring.

A vote for Caldwell is a vote against the alministration in its effort to settle the war with honor to the American flag and the American people because a congress hostile to the administration will be rogerded by Spain as a vote of want of confidence in the administration and will be a source of aid and comfort to Spain.

Maough Produced Yearly to Do Wor. of Seven Million Sewers by Hand.

There are made on the average in the United States, it is computed, 500,-000 sewing machines a year, and the extent of the sewing machine business is shown by figures which, if not sustained by official corroboration, might be thought to be extravagant. There are 65 sewing machine factories in the United States, with a gross capital of \$20,000,000, giving employment to 10,-000 persons and having annual receipts of more than \$15,000,000.

The American sewing machine industry is sufficiently large to supply not only the home market but the foreign market as well, and nine-tenths of all the machines made in the world wants run largely in these directions are produced in the United States, and So over the ordinary wire frames used practically all of them are protected by men for coat hangers she fitted by American patents and are the re- covers of pale pink and blue satin sults of Yankee ingenuity, perse-verance and discovery. In the figures of the sewing machine business of this country the important item of repairs cinating hung in rows in her closet-to machines is not included. It is a separate branch of the business, maintained apart from the manufacture of machines, and gives employment to a considerable number of persons. American sewing machines to the valus of about \$4,000,000 a year are shipped to other countries, and there is practically no country where the benefits of civilization are known in which American sewing muchines are not in use.

During the fiscal year of 1897 American sewing machines to the value of more than \$1,000,000-\$1,075,000-were exported from the United States to Great Britain. The American sales of sewing machines to Australia last year were exceeded by the exports of Amerwere exceeded by the exports of Amerone machines to Germany, "Oh!"—Pittsburgh Chronicle-Tele which amounted to \$701,000 last year, the machines being, of course, invoiced at wholesale and not at retail prices, and a sewing machine shipment of \$750,000 in value a year represents a selling value in Germany of certainly a million-perhaps considerably more. To Mexico last year were sold sewing machines to the value of \$200,000, to France \$125,000, to Canada \$100,000, to the Central American states \$100,000, to the Argentine republic \$100,000, to the United States of Colombia \$113,000 to Brazil \$115,000, to other states of South America collectively \$118,000, to European states, exclusive of England, France and Germany, \$195,000 to Ama \$52,000, to Africa \$18,000, and to the West Indies \$25,000, though prior to the Cuban war there was a large market for American machines in Cuba. It is computed that 500,000 machines can do the same amount of work as 7,000,000 sewers can do by hand.-Chicago Tribune.

It is More Thoroughly Removed by Carrying Out Than by Sweeping.

The floor being the lowest and largest horizontal surface in the room must collect the most dust. If covered with a woolen carpet, the dust shows less, but it is there just the same, and cannot be so thoroughly removed a from the smoothly finished wood. The carpet also absorbs odors which react it in the form of gases from cellar kitchen or bathroom. The hard-fin ished floor, protected by rugs, which may be carried into the open air to be freed from dust and odors, requires perhaps a little more daily care, buthat care results in a state of clean mess which the carpet can never have

Heavy, upholstered furniture, "tuft ed and fringed to the floor," is a store house for dust, and, because of this will soon become the home of destruc tive insects. The maternal moth miller knows well the advantage to her fu ture bables in the mixture of dust and grease such furniture affords. She al ways chooses dirty places in which to lay her eggs, knowing there will be ; rich food supply.

Sweeping is a process for the re moval of coarse dirt, not for dust, ex cept that which clings to the dirt par ticles. Thus a broom used upon a car pet removes some dust, but because quantity of the nap is taken off to which the dust clings. Sweeping is a dust-spreading, more than a dust-removing, process.

NOTES OF THE FASHIONS.

Various Items of Dress That Are No in Favor Among the Ladles.

It is rare, indeed, that any material ity as linen has done during the past iew seasons. From occasional indul gence it has become a regulation ma terial and is likely to increase in favor as its admirable qualities become known. A few women have always innulged in linen dresses, notably two or three who for years have not been without a summer suit and house diesses made of Barsley linen sheet This fabric is so delictously com fortable in feeling that those who have worn it express themselves with the utmost enthusiasm. Innen of algrades, colors and weights is used among the latest invasions being the employment of heavy striped linen for useful skirts and bleycle wear. There is also an extremely heavy twilled linen that makes the most perfect · nits imaginable. As a fabric for skirt and Eton jacket or blazer there is nothing that gives greater satisfac tion than this heavy twilled linen Carefully made up with regard to the grain of the cloth, they may be laun dered until there is scarcely a frag ment left of them. In days agone some practical women made all of their small boy's suits of this goods. It washes as early as an old handker clief, and, while it fades-or, rather deaches-it grows more lustrous an be tutiful with age, and the last wear of it is more satisfactory than the

Efforts to popularize overskirts de not seem to meet with any marked degree of success. The trimmed skirt is greatly preferred, and the general optnion is that it will take a year or two at least to bring the overskirt into prominence. Some of the most ar istic models made up in this way have fallen completely flat and can find no buyers at any price. Especially is this the case with those that have any marked peculiarities.

Among the interesting old books and papers belonging to the late Edward W. The chief town of New Jersey is said to be Elizabeth Town The climate is thus explained: "In the north are vast unknown Moun tains, perpetually covered with snow, from whence the Winds blowing the greatest part of the year these countries become much colder than those in Europe in the same latitudes." It is interesting to note that this work that is more than a century and a half old should advocate quite vigorously the construction of canals across the Panama and Suez isthmuses,-Hart ford Courant.

The number of uaval cadets is limited according to the following rule: Each member of the house of repre-sentatives is entitled to name one candidate to represent his district until he graduates, resigns or is discharged. In addition the president has the privilege of appointing one and ten annually at large. Two examinations for admis-sion are held each year, one in May and the other in September. The requirements of each candidate are: He must be between 15 and 19 years of age; he must be physically sound and able to pass a creditable examination in English grammar, United States history, geography, arithmetic and algebra as far as the theory of quadratic equations and their practice. MR. ROSS O'NEAL "K. P"

Mr. Ross O'Neal, who comes to the Powers Grand next Monday, October 24, in the leading role in "Sumanity, ' is noted as an expert swordsman, as his wonderful combat upon horseback proves this fact. Mr. O'Neal is a member of the grand lodge of Knights of Pythias and in most every city where "Humanity" has been this season his brothers have turned out in large numbers to see one of their brothers play such a noble hero as Mr. O'Neal does in "Humanity ' and to witness his wonderful combat on
